DETAILED ACTION

In response to the amendment filled on 1/21/2005, all the amendments to the claims have been entered and the action follows:

1. Applicant's arguments and amendments, see pages 1-12 of remarks, filed 1/21/2005, with respect to the claims have been fully considered and are persuasive. The rejection under 35 USC 112 and 35 USC 103 of all the claims has been withdrawn.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 27-42 are rejected under the judicially created doctrine of double patenting over Claims 1-26 of U. S. Patent No. 6,608,931, and Claims 1-21 of U.S. Patent 6,741,740, since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the U. S. Patent No. 6,608,931 and is covered by the patent since the patent and the application are claiming common subject matter as follows:

a process for determining candidate spectral endmember that represents a group of N spectra by defining a metric value range, wherein the N spectra having first metric values within the metric value range are defined as M spectra;

comparing each of the M spectra to determine the frequency with which each of the M spectra occurs within the N spectra; and

calculating a second metric value for each of the M spectra, wherein the second metric value combines the frequency of occurrence of each of the M spectra within the N spectra with a first metric value for each of the M spectra, wherein the M spectra having the largest second metric value is the at least one candidate endmember.

Furthermore, the subject matter claimed in the instant application is fully disclosed in the U. S. Patent No. 6,741,740 and is covered by the patent since the patent and the application are claiming common subject matter as follows:

The subject matter recited in Claims 27-42 of the instant application is a broad version and encompasses all limitations of Claims 1-21 of U.S. Patent 6,741,740.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

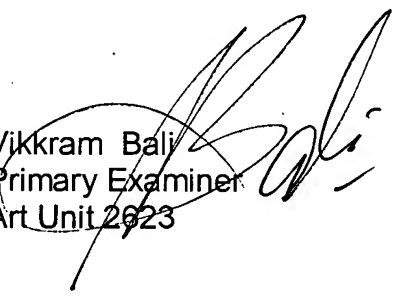

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
